President's Report

2022 saw the end of lockdowns and life starting to return to some semblance of 'normal' post COVID. With people returning to work, adoption rates slowed slightly, but it also provided the opportunity for Hunter Animal Rescue to engage with the local community again through adoption days and fundraising BBQs.

A total of 582 animals were brought into care during the year ended June 2022, this included 489 cats & kittens and 93 dogs & puppies. So, while adoptions did slow down compared to the previous year, that is still an average of 1.5 lives saved every day this year!!!

Of course, all these animals could not be saved without the wonderful efforts of all our volunteers. From our foster carers, carer coordinators and pound coordinators to the huge amount of work that goes on in the background such as managing animal registrations, transporting animals, coordinating and organising events and fundraising days, managing the generous donations and ensuring they are distributed to the carers that need them. There is also IT support, social media, animal listings and photography and the list goes on.

Our executive committee continues to work supporting the rest of the organisation, a huge thanks to Louise, Danielle, Caroline, Leanne and Carly. It is always a joy working alongside you!! A huge welcome to our newest member Carly who has brought a wonderful energy and is already making lots of improvements across the organisation.

We said good-bye to our President and volunteer extraordinaire, Yvette Phillips, as she takes a much-earned break from rescue to focus on other aspects of her busy life. Yvette has been involved with HAR for many, many years, not only as president and as an active member of the executive committee, but also as our animal coordinator, carer coordinator, and of course as a foster carer. Thank you Yvette for the tireless work you put in for many years, because of you, thousands of cats and dogs have been saved from euthanasia and are sleeping soundly in their forever homes tonight.

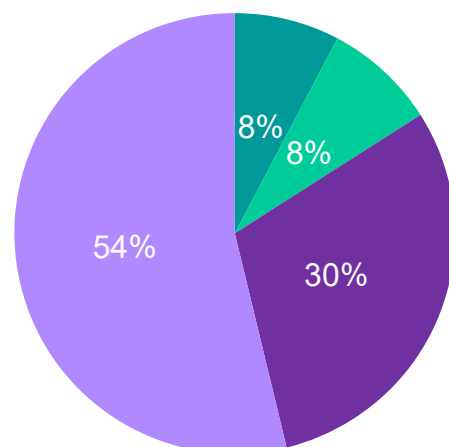

And finally, a big thank you to our members, supporters, veterinary partners and major sponsor PetQuarters. Together we continue to make Hunter Animal Rescue the well respected and successful rescue organisation it is.

Helen Perry

Acting President

IT Report

The website has been stable for most of the year, with a few minor tweaks and the usual maintenance. Kristy Huff has done an amazing job as always, keeping our site and other tech systems working, addressing issues as they arise, and providing support to us all as needed. Behind the scenes our hosts moved our site to a new server to keep things running smoothly.

Information about the Last Litter program was added to the website, as was an induction video and quiz for prospective volunteers.

The executive committee has been chipping away at evaluating options for an improved Animal Records Database to track admissions, rehoming and animal history including medical treatments. Some of these software options include features to manage carers and volunteers as well. The evaluation is ongoing and we hope to trial one of the shortlisted solutions soon.

This year we signed up with zero-cost Australian donations platform Raisely, which gives us a versatile online donations toolbox, support for recurring donations, and also support for mobile payments like Apple Pay and Google Pay. Our website donation form was replaced, and our donations bins now sport updated donation posters with QR codes linking to our new donation form. Our coin donation boxes will soon be updated to include a donation QR code as well.

We also launched our Recycle for Rescues initiative, with HAR listed in the Return and Earn app allowing anyone in NSW to donate their 10c recycling refund directly to us. Read more about it here:

<https://www.hunteranimalrescue.com.au/donate/#donate-row-recycle>

We would like to thank Kristy and her IT team for their hard work, and also all users of the HAR website for their feedback regarding the website over the past year. We hope that the website experience is one of discovery, ease of use, and enjoyment. We appreciate any further feedback.

Carer Spotlight - Rochelle Smith

1. How long have you been volunteering with HAR?

Just coming up to one year.

2. What made you want to join HAR?

I had previously done some foster care with another rescue, but loved the structure of the HAR organisation, the clear processes in place, the great HAR vets we work with and the wonderful support that HAR offers their carers – shout out to Kristy, my Carer Coordinator, who is amazing!

3. What is your favourite part of volunteering with HAR?

Apart from getting to spend all my free time with gorgeous kittens, it might surprise people to know that it is sending my fosters off to their new homes. Everyone asks me how I manage to say goodbye and “don’t you want to keep them all?”, but for me, goodbye is the goal, and it fills me with such joy to know that I’ve been able to support a cat or kitten in finding their forever home – plus it means I’ll be able to invite new kittens into my home very soon! I also love receiving messages and photos from people who’ve adopted animals that I’ve fostered - weeks and even months later - telling me how much they love their new family member.

4. What has been the most memorable experience so far?

Quite early on with HAR, I had the opportunity to care for a cat mum and her 6 beautiful babies, one of whom, Riley, wasn’t thriving. I had a teary night as I prepared for the fact that he probably wasn’t going to make it, but with the amazing support from our wonderful registrar, I was able to provide him the supportive care he needed and he has now grown into a gorgeous cat. Knowing the impact foster care had on his little life always reminds me how meaningful what we do is – HAR literally saves lives.

5. What is your role/what do you do for HAR?

I am a foster carer in West Lake Macquarie. I’ve mostly had the pleasure of caring for young kittens, which is a passion of mine.

6. What do you do outside of HAR?

I work full time as a Kindergarten teacher. My students know how much I adore kittens and tell all our visitors to the classroom about how I foster – I love that they’re learning about rescue and lots of them say they’d like to do it in the future! They also love it when I bring in a litter of babies to meet them! I’m lucky that my partner works from home, so he is able to provide daytime care to any cats or kittens who need it.

7. Do you have any pets? If so, what kind?

I have seven cats of my own: Ebony (pictured), Alistair, Charlie, Buffy, Teddy, Tali and Pepper – all of whom are rescues. I got to number six before a good friend of mine suggested that if I still wanted more kittens to care for, I should look into foster care – so I did! All my cats are amazingly good with the fosters and I’m lucky to have lots of room – including a big catio – to allow me to have heaps of felines around the house!

Volunteer Spotlight - Katinka Smith

1. How long have you been volunteering with HAR?

About 3½ fur filled fun years.

2. What made you want to join HAR?

I've had pets most of my life and am definitely more comfortable talking to an animal than a person. I wasn't in a position to have pets for a while so would get my fix of fur cuddles by pet sitting for friends. I finally found a rental I could have pets in but wasn't ready to commit to a full-time pet so fostering was the most logical step and it's been one of the best decisions I've made.

3. What is your favourite part of volunteering with HAR?

When you're fostering, it's definitely seeing the love and happy faces of the families your foster goes to. And I get to love the fosters in the meantime!

4. What has been the most memorable experience so far?

When I realised one of my fosters was destined for failure and he became my fur baby. But also, when I had a foster with wonky legs from a spinal defect and different coloured eyes. He had so much character and sass – and his new family kept my updated after he got adopted.

5. What is your role/what do you do for HAR?

I foster cats – mostly adults who are on the shy side. I'll also help out at events when I can. And the occasional cat taxi too.

6. What do you do outside of HAR?

I'm an Executive Assistant for a government funded not for profit organisation, working in supporting and improving NSW rural health workforce and communities. Away from work, I like to travel, read, hike, garden, spend time with family and hang out with my cat and fosters, and my partner and his dog.

7. Do you have any pets? If so, what kind?

Yes! I have my foster fail, Nemo. He's a bit on the chonky side and can be a bit bossy with the fosters but he's also very patient with them and shares all his toys so I think that makes up for the occasional cattitude.

And now that I have my own home there will surely be more fur babies and fosters to come.

Success Story – British Blues

Sophie, Margot, Lilibet and kitten Charlotte

A few days after New Year’s Eve, four beautiful British Shorthair girls were dumped in a pound overnight bin. The three adults Margot, Lilibet and Sophie, all needed dental work (poor Margot needed a full dental extraction!) and Sophie was also unwell with a digestive issue. Kitten Charlotte was still suckling but we weren’t sure who her mother was. We suspected the adults had been used for breeding, and it was clear they hadn’t been given a lot of freedom or human affection - all were timid, and Margot and Lilibet didn’t try to leave their cat room at all while in care.

Little Charlotte was quickly adopted and adapted beautifully to her new home and loving family.

After they’d recovered from their dental surgery and desexing in March, Princesses Margot and Lilibet were adopted together into a quiet home where they could relax and be loved. At first they hid from their new dad at every opportunity, mostly under the bed. It took six weeks for Margot to start to venture out, and while she’s still timid and unwilling to be picked up, she’s started to enjoy a tickle and a brush while she’s eating. Her dad says it’s “greatly encouraging progress”.

Lilibet (now Lily) is very affectionate, following her human everywhere and sleeping on his lap as often as she can. Lily’s quirky nature also started showing through when she decided sinks and baths were fun places to hang out.

Margot and Lily are also smitten with the latest addition to their family, a rescued 13yo Dachshund called Diva. Margot especially has found a soulmate, and can often be found snuggled up with Diva in the dog bed! Unbelievable progress, Margot! Both cats are going well, blossoming in the safety and love of a home where they can come out of their shells on their own terms and in their own time. Their patient dad is delighted: “It’s been a ‘slow burn’ settling in process, but very worthwhile and rewarding.”

Sophie recovered quickly from her dental surgery, but her digestive issues were exacerbated by stress and (with the new environment of being in care) took longer to settle. Her foster carer Carly worked hard to create a soothing environment and to gain Sophie's trust. Little did she know that this beautiful kitty was working her own magic at the same time. Sophie the Foster Fail is well and is now the delightfully relaxed and playful boss of her forever home. While she's shy of strangers, her confidence is improving and she loves a good chatter with both humans and birds. Belly rubs have been all the rage lately, and much to her new mum's surprise Sophie has enthusiastically embraced harness-walking adventures in the backyard!

Success Story – Peanut (Arthur)

In January 2022, seven year old Staffy x Foxy, Peanut, came into our home as a foster dog. He was surrendered to the pound as his owners could no longer keep him and their young children were overwhelming him. Beyond this information, we were unsure of much else of Peanut's background however we could tell he had had a very difficult, violent and traumatic life. Peanut's face and head was covered in significant scarring and he was terrified at the pound and when he first came into our care.

For the first few weeks, Peanut wouldn't let us touch him, he would run away and hide up in the backyard at meal times and any time we went out the back door. He was terrified and would shake and run away anytime we tried to clip a lead onto his collar and he wouldn't leave the yard without being carried. It was heartbreaking to see. It took a long time and lots of patience to build trust with Peanut.

Hours and hours, day after day, of sitting on the grass in the yard quietly, waiting for Peanut to approach me for a pat here and a treat there, until one day after 6 weeks, when he realised I wasn't going to hurt him, he started coming over for cuddles, rolling around on his back in the grass, playing chasies, picking up his toys to give to me and getting excited for meal times, treats and even started jumping around in excitement when a lead was brought out, because he knew it was walk time! For the first few walks, Peanut was very nervous but after a couple of days he would get so excited and wag his tail the whole time we were out exploring.

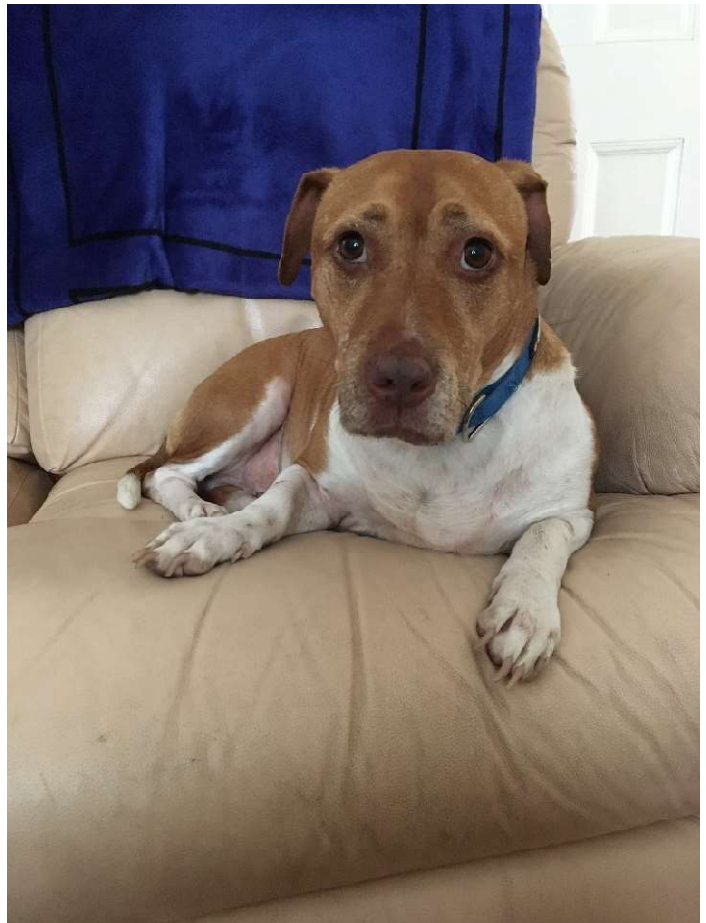

Once Peanut felt safe at our home, he was welcomed inside and introduced to our two resident cats. He was perfectly polite and well behaved around them and from that point on, loved snuggles on the lounge and in bed every night. The moment Peanut learned to trust, he was the sweetest, most well behaved and polite boy. As much as I helped him learn to trust humans again, Peanut helped me through a difficult time in my life too and was the best companion, motivator and little mate during that time.

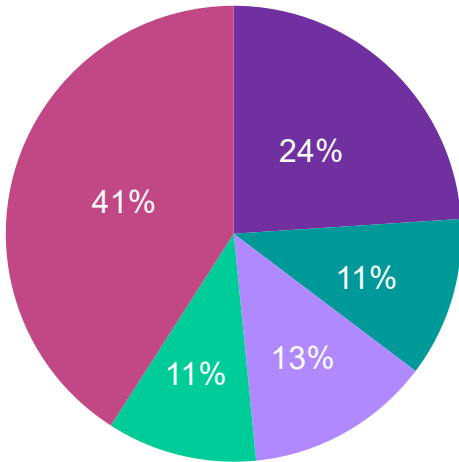

Out of the 9 foster dogs we've had in our home this past year, Peanut was the most challenging but by far the most rewarding and he reminded me every day why I became a foster carer and why I love it so much. Being able to see his journey and play a part in helping him learn how to trust and enjoy life as a dog, maybe for the first time ever, was such a beautiful experience that I'll never forget.

A few weeks passed by and a beautiful and gentle couple named Tania and James (and their one-eyed rescue cat, Aubrey), applied to adopt Peanut. He was a bit shy upon first meeting but after the second meeting and visiting their home and seeing how much he loved running around in the sun in their yard, we knew this was the perfect forever home for our Sweet Pea. He was renamed Arthur and adopted in March 2022. Arthur has definitely scored himself a sweet deal and spends his days up on the lounge for cuddles and out in the garden, or being taken out for shopping adventures. He spends his nights in his resident position on the end of the bed and is loved and cared for beyond words. We still keep in touch with Arthur's parents from time to time and get sent photos and updates every so often and it's the best thing to see!

Committee Report

Your committee members submit the financial report of the Hunter Animal Rescue ACN 51 265 469 006 for the financial year ended 30 June 2022.

Committee Members

The name of each member of the committee during the year and if different, at the date of the report;
Yvette Phillips (resigned 12 August 2022)

Helen Perry

Danielle Nicholls

Louise O'Brien

Caroline Hawkless

Leanne Simpson

Carly Lyddiard (appointed 16 August 2022)

Principal Activities

The principal activities of the association during the financial year were:

To foster and promote the rescue and rehoming of domestic animals in the Hunter area.

Significant Changes

No significant change in the nature of these activities occurred during the year.

Operating Result

The profit of the association after providing for income tax amounted to \$45,576.55.

Signed in accordance with a resolution of the Members of the Committee.

Notes to the Financial Statements

The financial statements cover Hunter Animal Rescue ACN 51 265 469 006 as an individual entity. Hunter Animal Rescue 51 265 469 006 is a not-for-profit Association incorporated in NSW under the Associations Incorporation Act 2009.

The functional and presentation currency of Hunter Animal Rescue ACN 51 265 469 006 is Australian dollars.

Comparatives are consistent with prior years, unless otherwise stated.

1 Basis of Preparation

In the opinion of the Committee of Management, the Association is not a reporting entity since there are unlikely to exist users of the financial report who are not able to command the preparation of reports tailored to satisfy specifically all of their information needs. These special purpose financial statements have been prepared to meet the reporting requirements of the Act.

The financial statements have been prepared in accordance with the recognition and measurement requirements of the Australian Accounting Standards and Accounting Interpretations, and the disclosure requirements of AASB 101 Presentation of Financial Statements, AASB 107 Statement of Cash Flows, AASB 108 Accounting Policies, Changes in Accounting Estimates and Errors and AASB 1054 Australian Additional Disclosures.

The financial statements have been prepared on an accruals basis and are based on historical costs modified, where applicable, by the measurement at fair value of selected non-current assets, financial assets and financial liabilities.

Significant accounting policies adopted in the preparation of these financial statements are presented below and are consistent with prior reporting periods unless otherwise stated.

The following significant accounting policies, which are consistent with the previous period unless stated otherwise, have been adopted in the preparation of this financial report.

2 Summary of Significant Accounting Policies

Inventories

Inventories are measured at cost. Cost of inventory is determined using the first-in-first-out basis and are net of any rebates and discounts received.

Plant and Equipment

Plant and equipment is carried at cost or fair value less, where applicable, any accumulated depreciation and impairment of losses. Plant and equipment is depreciated on a diminishing value basis over the assets useful life to the Association, commencing when the asset is ready for use.

Depreciation

The depreciable amount of all plant and equipment is depreciated over the useful lives of the assets to the association commencing from the time the asset is held ready for use.

Impairment of Non-Financial Assets

At the end of each reporting period the association determines whether there is any evidence of an impairment indicator for non-financial assets.

Where this indicator exists and regardless for goodwill, indefinite life intangible assets and intangible assets not yet available for use, the recoverable amount of the asset is estimated.

Where assets do not operate independently of other assets, the recoverable amount of the relevant cash-generating unit (CGU) is estimated.

The recoverable amount of an asset or CGU is the higher of the fair value less costs of disposal and the value in use. Value in use is the present value of the future cash flows expected to be derived from an asset or cash-generating unit.

Where the recoverable amount is less than the carrying amount, an impairment loss is recognised in profit or loss.

Reversal indicators are considered in subsequent periods for all assets which have suffered an impairment loss, except for goodwill.

Cash and Cash Equivalents

Cash and cash equivalents comprise cash on hand, demand deposits and short term investments which are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value.

Revenue and Other Income

Revenue is recognised when the amount of the revenue can be measured reliably, it is probable that economic benefits associated with the transaction will flow to the association and specific criteria relating to the type of revenue as noted below, has been satisfied.

All revenue is stated net of the amount of goods and services tax (GST).

Revenue is measured at the fair value of the consideration received or receivable and is presented net of returns, discounts and rebates.

Sale of goods

Revenue from the sale of goods is recognised at the point of delivery as this corresponds to the transfer of significant risks and rewards of ownership of the goods and the cessation of all involvement in those goods.

Rendering of services

Revenue in relation to rendering of services is recognised depending on whether the outcome of the services can be estimated reliably. If the outcome can be estimated reliably then the stage of completion of the services is used to determine the appropriate level of revenue to be recognised in the period. If the outcome cannot be reliably estimated then revenue is recognised to the extent of expenses recognised that are recoverable.

If the outcome cannot be reliably estimated then revenue is recognised to the extent of expenses recognised that are recoverable.

Revenue from training services is generally recognised once the training has been delivered.

Goods and Services Tax (GST)

Revenue, expenses and assets are recognised net of the amount of goods and services tax (GST), except where the amount of GST incurred is not recoverable from the Australian Taxation Office (ATO).

Receivables and payables are stated inclusive of GST.

The net amount of GST recoverable from, or payable to, the ATO is included as part of receivables or payables in the balance sheet.

Certificate by Members of the Committee

The committee has determined that the association is not a reporting entity and that this special purpose financial report should be prepared in accordance with the accounting policies outlined in Note 1 to the financial statements.

In the opinion of the committee the financial statements:

1. Presents a true and fair view of the financial position of Hunter Animal Rescue ACN 51 265 469 006 as at 30 June 2022 and its performance for the year ended on that date.
2. At the date of this statement, there are reasonable grounds to believe that Hunter Animal Rescue ACN 51 265 469 006 will be able to pay its debts as and when they fall due.

This statement is made in accordance with a resolution of the Committee and is signed for and on behalf of the Committee by:

President: _____
Helen Perry

Treasurer: _____
Louise O'Brien
